RECENT PROJECTS

Reading Rambo, Role: Contributing Developer

Repo: <https://github.com/cshepscorp/reading-rambo> | Deployed: <https://calm-river-58569.herokuapp.com/>

- This application utilizes API calls to Google Book Search and imdb to allow users to search for a beloved book or movie/show and then show that type of media's relevant counterpart - movies based on books and vice versa. Users can save a media item to their watchlist and comment on other users' added content.
- Utilizes the flexibility of GraphQL database and the dynamic nature of React to provide a sleek, informative user experience for keeping track of and discovering more about our favorite forms of media.
- Technologies Used: React, Javascript, MUI, GraphQL, Mongoose, Express, Node, JWT

Pokegen, Role: Contributing Developer

Repo: <https://github.com/cshepscorp/pokegen> | Deployed: <https://pokegen-rr.herokuapp.com>

- This application utilizes Express sessions and bcrypt to allow users to log in and create a dynamic Pokemon card. A visitor can also browse other users' Pokemon cards without logging in.
- Demonstrated our team's ability to utilize MySQL and Sequelize via Node.js to accept user data and display it in a fun, interactive interface.
- Technologies Used: HTML5, CSS, Javascript, Bootstrap, MySQL, Express, Node, Sequelize, Handlebars

Lorem Sipsup, Role: Contributing Developer

Repo: <https://github.com/cshepscorp/lorem-sipsup> | Deployed: <https://cshepscorp.github.io/lorem-sipsup/>

- This application enables users to search any city to find an event, restaurant, or brewery.
- Makes use of Ticketmaster, DocuMenu and OpenBreweriesDB API's to pull in results by city. A user can enter a city search term or select from a previously searched city to find a fitting event.
- Technologies Used: HTML5, CSS, Javascript, jQuery, Materialize

WORK EXPERIENCE

Web Manager and Designer

PopMount, Inc.
2018-Present

- Successfully converted all e-commerce industry sites from RapidWeaver to Shopify; builds and maintains all e-commerce websites, in addition to design and maintenance of all internal websites: PopMount.com (WordPress) and NewsKeepsake.com (Shopify).
- Processes orders using Photoshop, Illustrator and InDesign for daily print production.
- Creates and designs in-house graphics, templates, marketing efforts and digital outreach for internal use and outside business partnerships.

Senior Creative Services Designer

Nexstar / Media General
2011-2017

- Designed and implemented digital solutions for clients advertising on a network of 170+ broadcast television stations.
- Produced dynamic digital products, including banner ads (rich media, video, static), e-blasts, and responsive splash pages.
- Managed multiple projects and team members in a high-paced environment simultaneously to support project workflow and achieve set company goals.
